Professional Summary:

As a proficient Software Developer, I bring extensive experience in designing, developing, and maintaining software applications, with a robust foundation in both front-end and back-end systems. Over the past six months, I have been actively engaged in real-world projects, applying advanced skills acquired through comprehensive training, mentorship, and hands-on experience. My expertise in addressing complex issues with efficient solutions, coupled with a commitment to continuous learning and staying abreast of industry trends, ensures the delivery of high-quality results. My meticulous attention to detail, effective problem-solving abilities, and collaborative approach, along with strong communication skills, make me a valuable asset to any development team. My ongoing focus on research and teamwork further enhances my professional growth and contributions.

Technical Skills

- Python Object Oriented Development
- Django Templating Language
- Application & Software security
- Data Structures & Algorithms
- JavaScript
- HTML, CSS & Bootstrap
- Git & GitHub

Soft Skills:

- Effective Communication
- Attention to detail
- Project Management
- Critical thinking & problem solving
- Leadership & team building
- Collaboration
- Adaptability
- Quick learner

Experience

Refactory Academy, Kampala

Apprentice

June 2024 - Present

Currently engaged in real-world projects, applying skills acquired through comprehensive training, mentorship, and hands-on experience. I have effectively delivered solutions for various client needs, demonstrating a commitment to continuous learning, research, and teamwork, which has enhanced both my technical abilities and professional interactions.

Certificate in Software Engineering

Refactory Academy, Uganda

Feb 2024 - May 2024

Project: *Daycare Management System*

Developed a comprehensive software system to manage a daycare's stock and data needs using Python and Django, supplemented with HTML, CSS, and JavaScript. For database management, I utilized an SQL server, successfully addressing the project's requirements and delivering a functional and efficient solution.

Projects

Daycare Management System

Developed a web application to streamline daycare operations, including baby and babysitter check-ins/outs, inventory management, service scheduling, and payments. The system also generates transaction receipts for transparency and automation. Technologies used: Python, Django, HTML, CSS.

Personal Blogging Website

Created a personal website to document my journey, aspirations, and interests. Utilized HTML, CSS and Bootstrap to design a visually appealing and user-friendly platform.

Portfolio Website

Built a comprehensive personal portfolio website showcasing my projects, experience, and language proficiencies. Developed using JavaScript, HTML, and CSS to provide a detailed overview of my skills and achievements.

Awards

Certificate in Software Engineering

Refactory Academy

June 2024

Awarded upon completion of a rigorous three-month program encompassing both technical and non-technical training.

Certificate of Appreciation, Women in Fintech Hackathon

Hipipo, Include Everyone Organization

August 2023

Recognized for participation in a hackathon aimed at developing technological solutions for local financial sectors.

Education

Advanced Certificate in Software Engineering

Refactory Academy

June 2024 - November 2024

Certificate in Python Development

Refactory Academy

January 2024 - May 2024

Uganda Advanced Certificate of Education

Iganga Secondary School

2018 - 2019

Uganda Certificate of Education

St. Michael International School

2014 - 2017

Languages

- English
- Ateso
- German
- French
- Luganda
